

JIS College of Engineering

Odd Semester, 2015

B. Tech (Information Technology)-7th Semester

Internet Technology (IT-701)

Assignment ID: **JIS/OSem/IT701/0004**

I am: _____

Roll: _____ Date: _____

My Full Signature: _____

1. Write a Servlet application to show server's date and time.

? What happens if you declare and create Date object as an instance variable and not a local variable. *My answer:*

? An HTML page has 3 radio buttons, for the following date formats, 10/08/2015, 2015/10/08 and August 10, 2015. Modify to show date in chosen format only.

What did I Learn?

2. An HTML page holds the following fields: Roll, name and marks. The data input by a user should be handled by a servlet such that it is saved in a database table.

- Now, there is a hyperlink , which leads to render the names of the students in ascending order of alphabets
- Clicking on a student's name, which is itself a hyperlink, displays details of the student.

What did I Learn?

What drawback of the previous system do I Notice?
